5 Steps to Retain Your Digital Dentists

Here's how to build it.

Lab-selected Folder
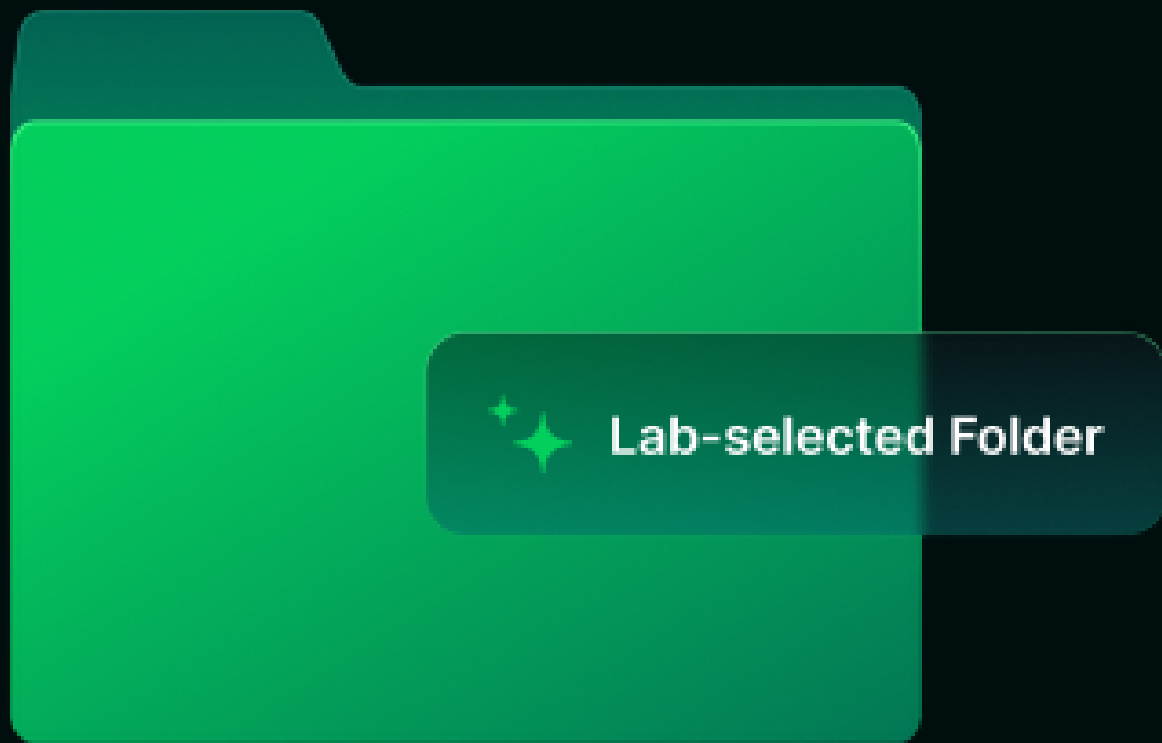

**1.**

The One Folder Rule

If a scan isn't in the shared intake folder, it doesn't exist.

2.

Set a Structure

Standardize naming conventions and file format to avoid errors.

3.

Use AI Automations

Connect portals to **EviSmart Downloader.**
It pulls scans + Rx in real time, organizes
them into one folder.

4.

Create a 'No Lost File' Policy

Every scan goes into one secure system, never email.
Daily sync checks ensure nothing slips through the cracks.

5.

Simplify Access, Strengthen Relationships

One upload. Always accessible.
Real-time visibility keeps workflows flowing.
Keep dentists loyal while protecting your revenue.

Retain dentists with frictionless workflows.

Share this guide with your team.
Keep your digital dentists.
Grow your lab.

Follow @evismartdental for more strategies top dental labs use to scale without friction.
